

Clear Mount Tape 12 mm

Art.: 05.2324.6100

Roll 10 m

Clear Mount Tape is a universally applicable double-sided transparent adhesive tape which is made from 100% acryl by a unique production process. This means that it combines an extremely strong core with outstanding adhesive power.

Clear Mount Tape has a temperature range of -35°C to $+95^{\circ}\text{C}$. Due to its extremely flexible core the product is extremely well suited to transparent applications requiring a little give or movement. Thanks to its homogeneous structure the tape does not absorb moisture.

This combination of properties means that Clear Mount Tape is extremely well suited to lots of applications in furniture, advertising, construction, and mobility. What we have in mind here is the fixing of transparent and translucent materials such as glass and polycarbonates. Important areas of application include solar cells, rain sensors, double glazing, antennae, logos, displays and natural emergency repairs.

The pre-cut sizes of 12 mm, 19 mm and 25 mm make that Clear Mount Tape is always ready for use in the applications described above.

- Transparent tape, ideal for applications where coloured tape is not suitable.
- Universally applicable on most surfaces.
- Repositionable during 5 minutes after application.
- Wide temperature range of -35°C to $+95^{\circ}\text{C}$.
- Elongation at break of at least 900% (according to ASTM D-412).
- Excellent adhesion strength.
- Largely UV-resistant.
