

PRODUCT INFO

Construction Primer Red-brown

Art.: 02.0400.0795

Aerosol can 500 ml

Construction Primer is a single component primer specially developed for the simple and professional priming of various surfaces. Construction Primer adheres perfectly to just about any type of surface such as metal, wood, and old layers of lacquer.

The product is extremely well suited as a base layer for a total paint system, or as corrosion protection for metal parts after repair or construction, for example. In addition, Construction Primer is also a perfect product for quickly and effectively providing a protective base layer for sanded-through edges or sides. One huge extra advantage of the product is that it is free of heavy metals such as lead.

Construction Primer is ideal as a universal primer for providing a protective base layer for supports, braces and other constructions, for example, which are custom welded or screw-fitted. In addition, the product is extremely well suited as an initial protective layer against the most common forms of mechanical damage.

The product has a very high solid content and excellent fluidity. Due to its fast drying Construction Primer is dust dry after just 5 minutes, and sandable after 10 minutes. Naturally, the product can be sprayed using just about any modern paint system.

Thanks to its aerosol packaging Construction Primer is extremely user-friendly and easy to apply. The product has a special nozzle, which gives a spray pattern exactly like the cone of a top loading spray gun. The nozzle is adjustable, so that the product can be sprayed horizontally and vertically.

- Perfect adhesion to metals, and also to old layers of paint.
- Professional finish and colour.
- High solid content.
- Excellent fluidity.
- Unique flat fan spray pattern with adjustable nozzle.
- Fast drying.
- Can be welded using all common welding systems.
- Can be sprayed over using just about any type of modern paint system.
- Excellent protection against rust.
- High temperature resistance (up to +110°C).
- OEM approved.
