

PRODUCT INFO

Deblock Oil XS

Art.: 03.1107.9999

Aerosol can 500 ml

Deblock Oil XS is a mix of quick rust solvers and lubricants, which is far more effective than ordinary penetrating oils. Thanks to very specific ingredients, the product provides, under extreme shear stress, such as when loosening rusty bolts or nuts, high quality interfacial lubrication to prevent re-seizing during disassembly.

Thanks to the slowly evaporating solvents, Deblock Oil XS can also be used in situations where a long-term creep is required and even release extremely rusted screw connections.

The product can be applied to all types of metal, also to sensitive joints, such as steel bolts in aluminium, to prevent damage when unscrewing.

Thanks to the unbreakable nozzle with straw, even hard-to-reach places can be treated without any problem. In addition, the aerosol is equipped with a special valve that allows it to be used in any position. This is a huge advantage because many mounting points are difficult to access or located underneath an object.

- Quickly loosens seized parts.
- Quick effect on rust, dirt, etc.
- Does not adversely affect rubber.
- Repels moisture.
- Absorbs extreme shear loads and thus provides additional lubrication during disassembly.
- Ideal for difficult applications such as aluminium/steel joints.
