

## Easy Polish 500 ml

Art.: 04.3154.9999

500 ml

Easy Polish is a unique polish for just about every type of modern lacquer. Due to its special composition Easy Polish provides fast and effective lacquer cleaning and protection. This means: 50% of the ingredients clean and the other 50% protect.

Not only does this property give Easy Polish a perfect shine and protective layer, but it is also extremely well suited to cleaning and repairing lacquers with light oxidation.

The big advantage is that Easy Polish does not leave white marks or chalk remains on unlacquered plastic parts or rubber. Easy Polish also gives excellent results on difficult colours such as black and blue, without clouding.

Easy Polish cleans and protects in one treatment without requiring much energy. The product can be easily applied and polished up by hand (using an Innotec [Multi Wipe](#) or [Spot Handpad](#)). In addition, the product is very easy to use with a polishing machine (better results will be achieved when using Body Shop Polish on an Innotec [Spot Pad Wool](#) or [Spot Pad Foam](#) in combination with the Innotec [Spot Pad Support](#)).

Thanks to its packaging in the very handy 500 ml bottle, Easy Polish is very user-friendly and easy to apply. The product is also available in economical 5 litre cans.

- Suitable for almost all modern lacquer types.
- Ideal for difficult colours (black, dark blue, etc.).
- Also suitable for chrome and painted plastics.
- Cleans and protects in one treatment.
- Very easy to use.
