

## PRODUCT INFO

### Fuel Plus

Art.: 04.0168.9999

Bottle 250 ml

Fuel Plus is a highly effective additive for maintaining the entire fuel system of petrol engines, including E85 (bioethanol). The product optimises combustion, which results in less pollution and wear.

Fuel Plus contains highly active substances ensuring that the petrol engine will perform better under all conditions. The product limits the occurrence of malfunctions by keeping the fuel system clean and preventing moisture and rust formation.

The product also ensures that the quality of the petrol remains optimal for a longer period of time (e.g. during winter storage of old-timers and motorcycles). The use of Fuel Plus leads to better combustion, which prevents the intake and EGR valves from getting stuck. In addition, the emission of harmful exhaust gases will be reduced.

Thanks to its unique composition, the product does not require any warning symbols.

The handy swan-neck bottle makes Fuel Plus very easy to add to the fuel system. The concentrated 250 ml content is sufficient for a full clean.

- Easy to use without disassembly.
- Cleans the entire fuel system.
- Powerful cleaning.
- Improves the combustion of unleaded petrol & bioethanol.
- Optimises fuel consumption.
- Reduces emissions of harmful exhaust gasses.
