

Hand Protector New Formula

Art.: 04.4171.9999

Aerosol can 150 ml

Hand Protector is a protective barrier cream that leaves a non-visible, dirt-repellent film on the outer layer of the skin. Hand Protector protects against all kinds of dirt trying to penetrate and stick to the skin and works like an invisible glove. It protects your hands from serious sources of dirt such as paint, grease and oil, plaster, sealant and glue.

Although it works as an invisible glove, Hand Protector feels natural and keeps the skin soft and supple.

When your hands are dirty after work they can be washed in water alone, or with water and soap. This means there is no need to use aggressive cleaning agents on your hands.

Thanks to its handy aerosol packaging Hand Protector is very user-friendly and economical and can be used in and outside of the workplace.

- Silicone-free and odourless.
- Easy to apply.
- Gives optimal protection against dirt in advance.
- Feels natural.
- Keeps the skin soft and supple.
- No need to use (aggressive) cleaning agents on your hands.
