

## PRODUCT INFO

# Injection Clean

Art.: 04.0165.9999

Bottle 250 ml

Injection Clean is a very powerful cleaner or fuel additive for the entire injection system, from tank to injectors, of petrol (incl. E85-bioethanol) and diesel engines. In addition, the product gives perfect protection against new dirt deposits, corrosion and the aggressive effect of bioethanol (E85) on rubber.

Injection Clean contains special active components to deal with specific problems such as resin and dirt deposits and fuel contaminated with water. The product also ensures better filling and lower consumption. When using Injection Clean the engine has a better output, shows better performance and has a longer life.

Thanks to its unique composition, the product does not require any warning symbols.

The handy swan-neck bottle makes Injection Clean very easy to add to the fuel system. The concentrated 250 ml content is sufficient for a full clean.

- Easy to use without disassembly.
- Cleans the entire injection system.
- Safe to use with all fuel types.
- Perfect for use with 2- and 4-stroke engines.
- Powerful cleaning.
- Effectively removes corrosion, resin and dirt deposits.
- Binds and burns fuel contaminated with water.
- Optimizes fuel efficiency.
