

PRODUCT INFO

Innogrease MP 260 400 g

Art.: 03.0601.9999

400 g

Innogrease MP 260 is an extremely high-grade multi-purpose grease, in which the carefully chosen EP additives are free of heavy metals. This guarantees the long life of the grease, which results in lower maintenance costs and extends the life of the lubricated parts.

Innogrease MP 260 is extremely well suited to applications in which the grease is exposed to high pressures and temperatures. In addition, the product is resistant to vibrating and jolting movements. In wet, dirty and dusty conditions MP 260 retains its lubricating effect.

Due to its very low frictional resistance and the property of being perfectly usable under humid conditions, Innogrease MP 260 is ideal as a universal lubricant in applications such as roller and ball bearings, wheel bearings, roller conveyors, heavy-duty turning and hinged constructions (e.g. sluices), and retains its lubricating effect even under water.

The handy 400 ml cartridges make Innogrease MP 260 very economical and easy to use. With the Innotec [Lube Shuttle Gun](#) the product is extremely easy to apply.

For central lubricating systems and bulk users we also offer 18 kg, 50 kg and 180 kg packs, supplied in barrels, which can be easily operated with a stamping pump.

- Temperature range of -25°C to +130°C.
- Pressure resistant to 260 kg (according to IP-239).
- Excellent greasing, even under water.
- Can be used under wet conditions as well as conditions affected by external factors.
- Also applicable under irregular shock and vibration loads.
