

PRODUCT INFO

Multisol 1 l

Art.: 04.0151.9999

1 l

Multisol is a professional degreaser specially developed to safely degrease the most common surfaces before gluing, sealing or any other activity.

Multisol quickly and effectively removes the remains of glue, sealant, oil, grease, dirt and silicones. Due to its slow evaporation the product has more time to take effect on the dirt. This also means that the dirt can be more easily absorbed on the cloth. In other words, if the solvent evaporates quickly only the dirt is moved and it cannot be absorbed.

All of these properties ensure that this product is extremely well suited as an all round degreaser for garages and body shops as well as for industry. Multisol is also specially developed for degreasing the surface in preparation for fixing stickers and advertising copy.

Multisol is packaged in a handy 1 litre can, but also deliverable in 5 litre cans.

- Can be applied universally.
- High dissolving power.
- Slow evaporation.
