

## PRODUCT INFO

### Powerbond XS 330 290 ml Black

Art.: 01.2419.0000

Cartridge 290 ml

Powerbond XS 330 is a high-quality adhesive sealant based on the newest generation of MS polymers. Thanks to the extremely high initial adhesion of this product, assembly jobs can be performed a lot easier and quicker. Powerbond XS 330 is perfectly suitable for applications in construction, industry and also transport.

Powerbond XS 330 is ideal for the fixation of decorative strips, mirrors, plinths or panel work, so that mounting can be done quickly and simply without additional support (or with restricted support only).

Powerbond XS 330 retains its elasticity and shows an excellent adhesion to the most frequent materials such as PVC, ABS, PC, Plexiglass, rubber, all types of wood, metals, concrete, plaster and glass. The product contains no solvents, as a result of which it is not subject to shrinkage or cracking. Neither does the product contain harmful plasticizers or isocyanates.

The handy 290 ml cartridges make Powerbond XS 330 very economical and easy to use.

- Extremely high initial adhesion.
- Retains its elasticity.
- For inside and outside applications on almost all (even damp) surfaces.
- High flexibility.
- Contains no solvents, harmful plasticizers or isocyanates.
- No shrinkage, no cracking.
- Temperature range from  $-40^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ .
