

PRODUCT INFO

Repaplast Repair Grey

Art.: 07.1431.0070

Twin cartridge 50 ml

Repaplast Repair is a dual component product especially designed for quick repairing and gluing of almost every type of modern plastic. Repaplast Repair adheres perfectly to all kinds of plastic and lacquered or bare metal parts. The product dries very quickly, as a result of which it can be further processed after just 15 minutes.

Gluing with plastic glue alone often does not provide sufficient strength. Repaplast Repair does not only create a strong bond, it also reinforces the break. Thanks to the product's flexibility, the repaired part can be put under repeated load again. Repaplast Repair is very easy to sand and can be sprayed over using just about any type of modern lacquer system.

As a part of the [Repaplast Plastic Repair System](#), Repaplast Repair can also be applied for the long-term repair of cracks and holes in plastics. For the fixing of larger holes Repaplast Repair is used in combination with [Repaplast Foundation Tape](#).

Repaplast Repair is very user-friendly and can be dosed very accurately thanks to the handy dual cartridge and the use of the [Mixer Gun](#). The special mixer nozzle ensures the right mixture proportions and prevents the remaining product from hardening in the cartridge. This means that an opened cartridge of Repaplast Repair can still be kept for a long time.
