

Seal and Bond Remover Foam

Art.: 04.0106.9999

Aerosol can 500 ml

Seal and Bond Remover Foam is a technical foam cleaner for the fast and efficient removal of glue residues and degreasing of just about any surface. Due to the foaming action, the product adheres perfectly to the surface, even if this is at an angle of 45° or 90°. This means that Seal and Bond Remover Foam not only works easily, but it is also very economical and effective. Economical because it is not applied on a cloth, but directly to the dirt. And effective because it works on the dirt for a longer period of time.

Seal and Bond Remover Foam is suitable for all types of metal and most plastics. In addition, it is also safe to use on just about all modern types of lacquer. This makes it extremely well suited to the removal of glue residues left behind from stickers, advertising slogans, emblems and protection strips. Also the remains of glue left behind after the removal of communication equipment, glasses holders and so on, can be safely removed without damaging the surface.

Before applying new stickers, advertising slogans or emblems, use Seal and Bond Remover Foam to make the surface perfectly free of grease and silicones. Due to the stable foam, the product adheres perfectly to the large vertical areas, panels and canvas.

Seal and Bond Remover Foam evaporates quickly, leaving no residues behind.

Due to its aerosol packaging Seal and Bond Remover Foam is very user-friendly and easy to use.

- Very easy to use.
- Stable foam, therefore it gives a longer working time, especially on vertical surfaces.
- Will not attack the majority of paints and plastics, therefore universally applicable.
- Provides a professional cleaning result.
- Fully washable and soluble in water.
