

# Sealer Applicator Sealant Gun

Art.: 90.0919.9999

The Sealer Applicator is a unique compressed air spray gun used to imitate original OEM structures in a professional and extremely simple way.

The Sealer Applicator is made of very high-quality and durable materials. Thanks to its special construction, it is possible to imitate a large variety of different structures with a minimum of steps. The gun is made in such a way that opened sealant cartridges can be kept for a very long time. This has the important advantage that the gun does not have to be cleaned as frequently.

What makes the Sealer Applicator unique is that it can be used with [Spray-Seal](#) and [Uniseal 700](#) for a perfect end-result.

The best result is obtained when the Sealer Applicator is used at an air pressure of between 4 and 6 bar. For even more accurate work, a special [Air Micrometer](#) is available. This makes it possible to regulate the maximum quantity of air.

Several replacement parts are available to service the Sealer Applicator.

- Very simple to imitate original OEM structures.
- Professional end result.
- Made of high-quality materials.
- Very simple to set up.
- Almost maintenance free.
- Opened cartridges can be kept in the gun.
