

Topfix Black 2-Component Mixture

Art.: 07.1435.0000

Twin cartridge 50 ml

Topfix is a quick and easy 2-component gluing product specifically designed for use in many different applications. Topfix has excellent adhesive power and can be used on many different surfaces, including plastic, metal, wood, etc. The product dries ultra fast, so that the glued part can generally be used again after 10 minutes.

Thanks to its unique formula, Topfix offers extremely strong gluing results. Topfix is also flexible to a certain extent, which allows the product to be used for a variety of applications. When combining the use of Topfix with [Repaplast Primer](#), you will get a unique combination of products which can even be used on the most difficult surfaces such as recycled plastic, natural stone, metal, stainless steel and PMMA.

Thanks to its unique properties, Topfix makes it possible to glue objects that were impossible to glue before. It also allows you to repair parts, which you would normally throw out. Topfix is also perfect for a wide range of emergency repairs.

Topfix offers great firm results and has an extended spray clean interval. This makes it perfectly suitable for vertical glue joints that cannot be glued or modelled in one go.

Topfix is very user-friendly and can be dosed very accurately thanks to the handy dual cartridge and the use of the [Mixer Gun](#). The special mixer nozzle ensures the right mixture proportions and prevents the remaining product from hardening in the cartridge. This means that an opened cartridge of Topfix can still be kept for a long time.

- Excellent adhesive power on many different surfaces.
- Ultra fast drying.
- Glued part can be handled soon after application.
- Very firm.
- Available in two shades: black or light grey.
- Good temperature resistance.
- 2-component product for quick gluing.
- Handy dual cartridge with mixer nozzle for accurate application.
- NSF registered (class P1), register number 148956.
