

Valve Clean

Art.: 04.0166.9999

Bottle 250 ml

Valve Clean is a very powerful cleaner or additive for the intake valves and the entire combustion chamber of 2- and 4-stroke engines. In addition, the product protects perfectly against new carbon deposits and corrosion.

Valve Clean contains special concentrated components to deal with specific problems such as resin and dirt deposits in the intake and EGR valves (intake manifold), and carbon deposits in the combustion chamber. The product also optimises engine power and fuel consumption, thereby increasing engine life.

Thanks to its unique composition, the product does not require any warning symbols.

The handy swan-neck bottle makes Valve Clean very easy to add to the fuel system. The concentrated 250 ml content is sufficient for a full clean.

- Easy to use without disassembly.
- Cleans the intake section of combustion engines.
- Safe to use with all fuel types.
- Effectively removes resin and dirt deposits.
- Protects against carbon deposits and corrosion.
- Optimizes fuel efficiency.
