

PRODUCT INFO

Zinc Coat

Art.: 02.1106.0070

Aerosol can 500 ml

Zinc Coat is a special rust-preventing coating made from zinc. The product can be used before and after welding. Zinc Coat provides a protective layer which can be CO₂ and spot welded.

During welding Zinc Coat will not spatter and will burn only minimally. This guarantees a very high level of protection.

Due to the addition of epoxy the product provides a unique top layer, which can serve, once it is hard, as a base layer for just about every sealant and paint system.

Zinc Coat offers excellent adhesion and perfect cover.

Thanks to its aerosol packaging Zinc Coat is extremely user-friendly and easy to apply.

- Weldable, even with CO₂.
- Sandable after full curing.
- Paintable with almost all modern paint systems.
- Strong corrosion protection on metal surfaces.
