Xpress Wax

Art.: 04.3170.9999

2 chamber pressure can 200 ml

Xpress Wax is a unique sprayable speed wax for cars, motorcycles, caravans, boats and all other high-gloss surfaces.

Xpress Wax is a liquid with hydrophobic wax technology, which is applied to the surface to be treated by fine spraying. In combination with the Innotec [Xpress Towel](#) (soft microfiber cloth), Xpress Wax gives a shiny, streak-free result in no time. In addition to a long-lasting deep shine, the product also provides protection. The application and light rubbing also has a cleaning effect. Please note: heavily soiled surfaces must be pre-cleaned with [Xpress Wash](#) to prevent possible scratches caused by rubbing in contaminants.

Xpress Wax is applicable to all glossy paints, plastics, (safety) glass, chrome, mirrors and high-gloss furniture / kitchens. Thanks to the hydrophobic wax technology, it creates a very beautiful and smooth glossy layer that has a protective and water-repellent effect ("lotus effect"), so that dirt also adheres less quickly.

The special pressure pack based on air pressure instead of regular propellant gases can be used at any angle (360°) and can be emptied completely (100%).

- Beautiful shine.
- Does not leave a white haze.
- Applicable on almost all high-gloss surfaces.
- Water and dirt repellent due to the applied hydrophobic wax technology.
- Effortless application (quick treatment with quickly visible result).
- Pleasant odour.
- Unique pressure pack.
