

## PRODUCT INFO

# Seal Guard

Art.: 02.0412.6100

Tin 250 ml

Seal Guard is a very high-grade adhesion promoting primer used to improve the adhesion of a variety of sealants. The product is extremely well suited to use on porous materials and most other surfaces.

Seal Guard is specially developed to give a variety of sealants perfect adhesion to difficult surfaces such as ceramic, concrete, cement, natural stone, metal, plastics, etc. In addition, the product is suited to applications involving moisture exposure.

Seal Guard is packaged in a handy recloseable tin. The product can be used with a brush, cloth or spray gun, to obtain the best possible output.

Seal Guard is part of the Innotec joint and sealant system. In combination with Innotec [Back Fill Foam](#), [Easy Seal XS](#) and [Seal Fluid](#), this system is the solution for seams and joints subject to heavy stress.

- Improves adhesion of a variety of sealants.
- Can be used on ceramics, concrete, cement, natural stone, metal, plastics, etc.
- Excellent for kitchen and bathroom applications.
- Suited to applications involving moisture exposure.
- Easy to apply with a brush, spray gun or cloth.
