

Xpress Tyre Gloss

Art.: 04.0125.9999

Aerosol can 500 ml

Xpress Tyre Gloss is an easy-to-apply tyre dressing that leaves a discreet, even satin finish.

Xpress Tyre Gloss is a foaming product, which ensures good adhesion to vertical surfaces. Due to its unique composition, the foam breaks down quickly, so that the product has just enough time to adhere to the rubber and almost immediately afterwards leaves a glossy protective layer that is also water and dirt repellent. This ensures that the tyre will retain its optimal condition and its original new appearance much longer.

Xpress Tyre Gloss is suitable for all types of tyres and can be used on both dry and slightly damp tyres. The product is very easy to use: spray on thinly, allow to work in, and ready! (only make sure not to spray on the rim, the tread of the tyre or the braking system) For optimal results, it is advisable to clean the rims before treating the tyres. Wheel Clean Pro is the perfect product for this.

- Foam that breaks down quickly: stable and does not run off on vertical surfaces.
- Leaves a transparent, even shine.
- Forms a water and dirt repellent protective layer on the tyre.
- Protects against weathering.
- Very easy to apply.
- Suitable for all types of tyres.
