

Industrial Floor Cleaner 1 l

Art.: 04.1154.9999

1 l

Industrial Floor Cleaner is a powerful floor cleaner for removing grease, oil, soot and mineral contaminants from hard, water-resistant floors. Low foaming and therefore ideal for scrubber dryers. Concentrated ECO formula, as effective as conventional products.

Industrial Floor Cleaner is a highly concentrated alkaline floor cleaner for industrial applications. The Innotec floor cleaner is extremely suitable for removing heavy soiling from all alkali- and water-resistant floors such as concrete, tiles and all kinds of industrial coatings.

Due to its ecological surfactants, Industrial Floor Cleaner has obtained the exclusive EU Ecolabel that is accepted throughout the European Union. The ecological formula is made from renewable raw materials and is fully biodegradable within 28 hours.

Industrial Floor Cleaner has been specially developed for being used in scrubber dryers with a concentration of only 0.5 to 1%. When used manually, higher concentrations can be used to locally dissolve very heavy soiling.

Industrial Floor Cleaner is available in an easy-to-handle 1 litre packaging with ergonomic dosing system as well as in a 5 litre bulk packaging.

Innotec ECO  maximum innovation
minimal impact

- Industrial floor cleaner for alkali- and water-resistant floors.
- Highly concentrated ECO formula.
- Very powerful cleaning for soiling such as soot, oil, grease and mineral contamination.
- Specially developed for scrubber dryers.
- Very low foaming character.
- Dilute 1 litre of concentrate with 100 to 200 litres of water.
- Also suitable for manual processing.
- pH 13.
- Pleasant citrus scent.
- Made from natural raw materials.
- EU Ecolabel certification.
- Fully biodegradable within 28 hours.
- Available in 1 litre and 5 litre packaging.
