

Plastic Fix 2-Component Repair Glue

Art.: 07.1472.6100

Twin cartridge 50 ml

Plastic Fix is an extremely fast and transparent 2-component repair glue, specially developed for small repairs of almost all plastics.

Due to its special composition, Plastic Fix enables extremely fast bonding of almost all plastics. It is the perfect solution for the automotive industry, where it is often desirable to glue things quickly and professionally.

Plastic Fix has some unique properties that allow the gluing of plastic parts on which it is very difficult to create a good bond. Repairs that used to take a lot of time can be carried out professionally in less than no time with Plastic Fix.

Clamping is only necessary for a short time or often not at all. This makes Plastic Fix extremely suitable for quick repairs and all types of emergency repairs. Due to the good stability and optimal open time, the product is also perfect for vertical repairs.

The unique composition of Plastic Fix makes that any connection joint will take on the colour of the glued part and will not turn white.

Plastic Fix is very easy to use and can be dosed very accurately thanks to the handy dual cartridge and the use of the [Mixer Gun](#). The special Innotec [Mixer Nozzle](#) always ensures the right mixture proportions and prevents the remaining product from hardening in the cartridge. This means that an already opened cartridge of Plastic Fix can still be kept for a long time.

- Transparent 2-component glue.
- Quickly touch-dry and ready for further treatment.
- Extremely fast drying, open time \pm 25 sec.
- Very good adhesion to almost all plastics.
- Free from H351 and GHS08.
- Extremely high tensile strength.
- Transparent, fits perfectly with most plastics.
- Good temperature resistance.
- Handy dual cartridge with mixer nozzle.
