

Product info

Flex Coat Black

Art.: 02.1132.5000

Aerosol can 500 ml

Flex Coat is a totally PVC-free stone chip protection that provides a perfect anti-corrosion coating and has excellent sound deadening qualities. OEM structures can be perfectly imitated.

Flex Coat is isocyanate-free and retains its flexibility at all times. The product is also completely PVC-free, making it extremely easy to sand when dry. Flex Coat offers perfect adhesion to bare metal and primed metal. It is extremely fast drying and after 10 minutes Mutliflex Coating Spray can be sprayed wet-on-wet using just about any type of solvent-based paint system. When using water-based paints, Flex Coat must be completely cured and preferably lightly sanded with an abrasive cloth (Scotch-Brite Grey) or a P320 sandpaper.

Flex Coat can be used for repairs to vehicles and to restore the factory original coating. On vehicles these coatings are applied to the sills, wheel arches, and other bodywork parts.

Another important property of the product is that it is resistant to solvents when fully cured.

Thanks to its aerosol packaging Flex Coat is extremely user-friendly and easy to apply.

- Ideal to imitate OEM structures.
- Free of PVC and isocyanates.
- Easy to apply.
- Perfect adhesion to bare metal and primed metal.
- Can be painted over after 10 minutes with most solvent-based paint systems. When using water based paints, Flex Coat must be completely cured and preferably lightly sanded with an abrasive cloth (Scotch-Brite Grey) or a P320 sandpaper.
- Perfectly sandable when dry.
- Resistant to solvents when fully cured.
- Remains flexible and does not age.
- UV resistant.
